**Mobile:** 083 3939130

**PROFESSIONAL PROFILE** A person focused on work where he always works to achieve the maintenance rates proposed by the company. I started my professional career in 2004 at the company GE Transportation as a maintenance planning technician. Since then I worked for several companies, always working in the maintenance sector, working so that all maintenance standards were executed in the best possible way. Over time I acquired leadership roles where I was able to develop my skills. I also worked in the health and safety sector.
